Methodology

Nielsen BookScan gathers point-of-sale book data from more than 16,000 locations across the U.S., representing about 85% of the nation's book sales.

Print-book data providers include all major booksellers (now inclusive of Wal-Mart) and Web retailers, and food stores. E-book data providers include all major e-book retailers (Apple excepted). Free e-books and those sold for less than 99 cents are excluded. The fiction and nonfiction lists in all formats include both adult and juvenile titles; the business list includes only adult titles. The combined lists track sales by title across all print and e-book formats; audio books are excluded. Refer questions to Michael.Boone@wsj.com.
